RISK FACTORS

Investing in the Securities involves a high degree of risk and may result in the loss of your entire investment. Before making an investment decision with respect to the Securities, we urge you to carefully consider the risks described in this section and other factors set forth in this Form C. In addition to the risks specified below, the Company is subject to the same risks that all companies in its business, and all companies in the economy, are exposed to. These include risks relating to economic downturns, political and economic events and technological developments (such as hacking and the ability to prevent hacking). Additionally, early-stage companies are inherently riskier than more developed companies. Prospective Investors should consult with their legal, tax and financial advisors prior to making an investment in the Securities. The Securities should only be purchased by persons who can afford to lose all of their investment.

Risks Related to the Company's Business and Industry

We have a limited operating history upon which you can evaluate our performance, and accordingly, our prospects must be considered in light of the risks that any new company encounters.

The Company is still in an early phase and we are just beginning to implement our business plan. There can be no assurance that we will ever operate profitably. The likelihood of our success should be considered in light of the problems, expenses, difficulties, complications and delays usually encountered by early-stage companies. The Company may not be successful in attaining the objectives necessary for it to overcome these risks and uncertainties.

Global crises such as COVID-19 can have a significant effect on our business operations and revenue projections.

With shelter-in-place orders and non-essential business closings potentially happening throughout 2020, 2021 and into the future due to COVID-19, the Company's revenue has been adversely affected by issues of procuring proper supplies, shipping times, and increased delays in production.

The amount of capital the Company is attempting to raise in this Offering may not be enough to sustain the Company's current business plan.

In order to achieve the Company's near and long-term goals, the Company may need to procure funds in addition to the amount raised in the Offering. There is no guarantee the Company will be able to raise such funds on acceptable terms or at all. If we are not able to raise sufficient capital in the future, we may not be able to execute our business plan, our continued operations will be in jeopardy and we may be forced to cease operations and sell or otherwise transfer all or substantially all of our remaining assets, which could cause an Investor to lose all or a portion of their investment.

We may face potential difficulties in obtaining capital.

We may have difficulty raising needed capital in the future as a result of, among other factors, our lack of revenues from sales, as well as the inherent business risks associated with our Company and present and future market conditions. Our business primarily generates revenue through sales and future sources of revenue may not be sufficient to meet our future capital requirements. We will require additional funds to execute our business strategy and conduct our operations. If adequate funds are unavailable, we may be required to delay, reduce the scope of or eliminate one or more of our research, development or commercialization programs, product launches or marketing efforts, any of which may materially harm our business, financial condition and results of operations.

We may implement new lines of business or offer new products and services within existing lines of business.

As an early-stage company, we may implement new lines of business at any time. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services, we may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved, and price and profitability targets may not prove feasible. We may not be successful in introducing new products and services in response to industry trends or developments in technology, or those new products may not achieve market acceptance. As a result, we could lose business, be forced to price products and

services on less advantageous terms to retain or attract clients or be subject to cost increases. As a result, our business, financial condition or results of operations may be adversely affected.

We rely on other companies to provide components and services for our products.

We depend on suppliers and contractors to meet our contractual obligations to our customers and conduct our operations. Our ability to meet our obligations to our customers may be adversely affected if suppliers or contractors do not provide the agreed-upon supplies or perform the agreed-upon services in compliance with customer requirements and in a timely and cost-effective manner. Likewise, the quality of our products may be adversely impacted if companies to whom we delegate manufacture of major components or subsystems for our products, or from whom we acquire such items, do not provide components which meet required specifications and perform to our and our customers' expectations. Our suppliers may be unable to quickly recover from natural disasters and other events beyond their control and may be subject to additional risks such as financial problems that limit their ability to conduct their operations. The risk of these adverse effects may be greater in circumstances where we rely on only one or two contractors or suppliers for a particular component. Our products may utilize custom components available from only one source. Continued availability of those components at acceptable prices, or at all, may be affected for any number of reasons, including if those suppliers decide to concentrate on the production of common components instead of components customized to meet our requirements. The supply of components for a new or existing product could be delayed or constrained, or a key manufacturing vendor could delay shipments of completed products to us adversely affecting our business and results of operations.

We rely on various intellectual property rights, including trademarks, in order to operate our business.

The Company relies on certain intellectual property rights to operate its business. The Company's intellectual property rights may not be sufficiently broad or otherwise may not provide us a significant competitive advantage. In addition, the steps that we have taken to maintain and protect our intellectual property may not prevent it from being challenged, invalidated, circumvented or designed-around, particularly in countries where intellectual property rights are not highly developed or protected. In some circumstances, enforcement may not be available to us because an infringer has a dominant intellectual property position or for other business reasons, or countries may require compulsory licensing of our intellectual property. Our failure to obtain or maintain intellectual property rights that convey competitive advantage, adequately protect our intellectual property or detect or prevent circumvention or unauthorized use of such property, could adversely impact our competitive position and results of operations. We also rely on nondisclosure and noncompetition agreements with employees, consultants and other parties to protect, in part, trade secrets and other proprietary rights. There can be no assurance that these agreements will adequately protect our trade secrets and other proprietary rights and will not be breached, that we will have adequate remedies for any breach, that others will not independently develop substantially equivalent proprietary information or that third parties will not otherwise gain access to our trade secrets or other proprietary rights. As we expand our business, protecting our intellectual property will become increasingly important. The protective steps we have taken may be inadequate to deter our competitors from using our proprietary information. In order to protect or enforce our patent rights, we may be required to initiate litigation against third parties, such as infringement lawsuits. Also, these third parties may assert claims against us with or without provocation. These lawsuits could be expensive, take significant time and could divert management's attention from other business concerns. The law relating to the scope and validity of claims in the technology field in which we operate is still evolving and, consequently, intellectual property positions in our industry are generally uncertain. We cannot assure you that we will prevail in any of these potential suits or that the damages or other remedies awarded, if any, would be commercially valuable.

The Company's success depends on the experience and skill of the board of directors, its executive officers and key employees.

We are dependent on our board of directors, executive officers and key employees. These persons may not devote their full time and attention to the matters of the Company. The loss of our board of directors, executive officers and key employees could harm the Company's business, financial condition, cash flow and results of operations. In particular, we are dependent on Che Voight, our Chief Executive Officer, John Speicher, our Chief Technology Officer, Kelly Graves, our Consulting CFO and Scott Becker, our Director. The loss of Che Voigt, John Speicher, Kelly Graves, or any member of the board of directors or executive officer could harm the Company's business, financial condition, cash flow and results of operations.

Although dependent on certain key personnel, the Company does not have any key person life insurance policies on any such people.

We are dependent on certain key personnel in order to conduct our operations and execute our business plan, however, the Company has not purchased any insurance policies with respect to those individuals in the event of their death or disability. Therefore, if any of these personnel die or become disabled, the Company will not receive any compensation to assist with such person's absence. The loss of such person could negatively affect the Company and our operations. We have no way to guarantee key personnel will stay with the Company, as many states do not enforce non-competition agreements, and therefore acquiring key man insurance will not ameliorate all of the risk of relying on key personnel.

Damage to our reputation could negatively impact our business, financial condition and results of operations.

Our reputation and the quality of our brand are critical to our business and success in existing markets, and will be critical to our success as we enter new markets. Any incident that erodes consumer loyalty for our brand could significantly reduce its value and damage our business. We may be adversely affected by any negative publicity, regardless of its accuracy. Also, there has been a marked increase in the use of social media platforms and similar devices, including blogs, social media websites and other forms of internet-based communications that provide individuals with access to a broad audience of consumers and other interested persons. The availability of information on social media platforms is virtually immediate as is its impact. Information posted may be adverse to our interests or may be inaccurate, each of which may harm our performance, prospects or business. The harm may be immediate and may disseminate rapidly and broadly, without affording us an opportunity for redress or correction.

Our business could be negatively impacted by cyber security threats, attacks and other disruptions.

We continue to face advanced and persistent attacks on our information infrastructure where we manage and store various proprietary information and sensitive/confidential data relating to our operations. These attacks may include sophisticated malware (viruses, worms, and other malicious software programs) and phishing emails that attack our products or otherwise exploit any security vulnerabilities. These intrusions sometimes may be zero-day malware that are difficult to identify because they are not included in the signature set of commercially available antivirus scanning programs. Experienced computer programmers and hackers may be able to penetrate our network security and misappropriate or compromise our confidential information or that of our customers or other third-parties, create system disruptions, or cause shutdowns. Additionally, sophisticated software and applications that we produce or procure from third-parties may contain defects in design or manufacture, including "bugs" and other problems that could unexpectedly interfere with the operation of the information infrastructure. A disruption, infiltration or failure of our information infrastructure systems or any of our data centers as a result of software or hardware malfunctions, computer viruses, cyber-attacks, employee theft or misuse, power disruptions, natural disasters or accidents could cause breaches of data security, loss of critical data and performance delays, which in turn could adversely affect our business.

Security breaches of confidential customer information, in connection with our electronic processing of credit and debit card transactions, or confidential employee information may adversely affect our business.

Our business requires the collection, transmission and retention of personally identifiable information, in various information technology systems that we maintain and in those maintained by third parties with whom we contract to provide services. The integrity and protection of that data is critical to us. The information, security and privacy requirements imposed by governmental regulation are increasingly demanding. Our systems may not be able to satisfy these changing requirements and customer and employee expectations, or may require significant additional investments or time in order to do so. A breach in the security of our information technology systems or those of our service providers could lead to an interruption in the operation of our systems, resulting in operational inefficiencies and a loss of profits. Additionally, a significant theft, loss or misappropriation of, or access to, customers' or other proprietary data or other breach of our information technology systems could result in fines, legal claims or proceedings.

The use of individually identifiable data by our business, our business associates and third parties is regulated at the state, federal and international levels.

The regulation of individual data is changing rapidly, and in unpredictable ways. A change in regulation could adversely affect our business, including causing our business model to no longer be viable. Costs associated with information security – such as investment in technology, the costs of compliance with consumer protection laws and costs resulting from consumer fraud – could cause our business and results of operations to suffer materially. Additionally, the success of our online operations depends upon the secure transmission of confidential information over public networks, including the use of cashless payments. The intentional or negligent actions of employees, business associates or third parties may undermine our security measures. As a result, unauthorized parties may obtain access to our data systems and misappropriate confidential data. There can be no assurance that advances in computer capabilities, new discoveries in the field of cryptography or other developments will prevent the compromise of our customer transaction processing capabilities and personal data. If any such compromise of our security or the security of information residing with our business associates or third parties were to occur, it could have a material adverse effect on our reputation, operating results and financial condition. Any compromise of our data security may materially increase the costs we incur to protect against such breaches and could subject us to additional legal risk.

The Company is not subject to Sarbanes-Oxley regulations and may lack the financial controls and procedures of public companies.

The Company may not have the internal control infrastructure that would meet the standards of a public company, including the requirements of the Sarbanes Oxley Act of 2002. As a privately-held (non-public) Company, the Company is currently not subject to the Sarbanes Oxley Act of 2002, and its financial and disclosure controls and procedures reflect its status as a development stage, non-public company. There can be no guarantee that there are no significant deficiencies or material weaknesses in the quality of the Company's financial and disclosure controls and procedures. If it were necessary to implement such financial and disclosure controls and procedures, the cost to the Company of such compliance could be substantial and could have a material adverse effect on the Company's results of operations.

We operate in a highly regulated environment, and if we are found to be in violation of any of the federal, state, or local laws or regulations applicable to us, our business could suffer.

We are also subject to a wide range of federal, state, and local laws and regulations, such as local licensing requirements, and retail financing, debt collection, consumer protection, environmental, health and safety, creditor, wage-hour, anti-discrimination, whistleblower and other employment practices laws and regulations and we expect these costs to increase going forward. The violation of these or future requirements or laws and regulations could result in administrative, civil, or criminal sanctions against us, which may include fines, a cease and desist order against the subject operations or even revocation or suspension of our license to operate the subject business. As a result, we have incurred and will continue to incur capital and operating expenditures and other costs to comply with these requirements and laws and regulations.

Risks Related to the Offering

State and federal securities laws are complex, and the Company could potentially be found to have not complied with all relevant state and federal securities law in prior offerings of securities.

The Company has conducted previous offerings of securities and may not have complied with all relevant state and federal securities laws. If a court or regulatory body with the required jurisdiction ever concluded that the Company may have violated state or federal securities laws, any such violation could result in the Company being required to offer rescission rights to investors in such offering. If such investors exercised their rescission rights, the Company would have to pay to such investors an amount of funds equal to the purchase price paid by such investors plus interest from the date of any such purchase. No assurances can be given the Company will, if it is required to offer such investors a rescission right, have sufficient funds to pay the prior investors the amounts required or that proceeds from this Offering would not be used to pay such amounts.

In addition, if the Company violated federal or state securities laws in connection with a prior offering and/or sale of its securities, federal or state regulators could bring an enforcement, regulatory and/or other legal action against the Company which, among other things, could result in the Company having to pay substantial fines and be prohibited from selling securities in the future.

The Company could potentially be found to have not complied with securities law in connection with this Offering related to “Testing the Waters.”

Prior to filing this Form C, the Company engaged in “testing the waters” permitted under Regulation Crowdfunding (17 CFR 227.206), which allows issuers to communicate to determine whether there is interest in the offering. All communication sent is deemed to be an offer of securities for purposes of the antifraud provisions of federal securities laws. Any Investor who expressed interest prior to the date of this Offering should read this Form C thoroughly and rely only on the information provided herein and not on any statement made prior to the Offering. The communications sent to Investors prior to the Offering are attached as Exhibit E.

The U.S. Securities and Exchange Commission does not pass upon the merits of the Securities or the terms of the Offering, nor does it pass upon the accuracy or completeness of any Offering document or literature.

You should not rely on the fact that our Form C is accessible through the U.S. Securities and Exchange Commission’s EDGAR filing system as an approval, endorsement or guarantee of compliance as it relates to this Offering. The U.S. Securities and Exchange Commission has not reviewed this Form C, nor any document or literature related to this Offering.

Neither the Offering nor the Securities have been registered under federal or state securities laws.

No governmental agency has reviewed or passed upon this Offering or the Securities. Neither the Offering nor the Securities have been registered under federal or state securities laws. Investors will not receive any of the benefits available in registered offerings, which may include access to quarterly and annual financial statements that have been audited by an independent accounting firm. Investors must therefore assess the adequacy of disclosure and the fairness of the terms of this Offering based on the information provided in this Form C and the accompanying exhibits.

The Company’s management may have broad discretion in how the Company uses the net proceeds of the Offering.

Unless the Company has agreed to a specific use of the proceeds from the Offering, the Company’s management will have considerable discretion over the use of proceeds from the Offering. You may not have the opportunity, as part of your investment decision, to assess whether the proceeds are being used appropriately.

The Company has the right to limit individual Investor commitment amounts based on the Company’s determination of an Investor’s sophistication.

The Company may prevent any Investor from committing more than a certain amount in this Offering based on the Company’s determination of the Investor’s sophistication and ability to assume the risk of the investment. This means that your desired investment amount may be limited or lowered based solely on the Company’s determination and not in line with relevant investment limits set forth by the Regulation CF rules. This also means that other Investors may receive larger allocations of the Offering based solely on the Company’s determination.

The Company has the right to extend the Offering Deadline.

The Company may extend the Offering Deadline beyond what is currently stated herein. This means that your investment may continue to be held in escrow while the Company attempts to raise the Target Offering Amount even after the Offering Deadline stated herein is reached. While you have the right to cancel your investment in the event the Company extends the Offering Deadline, if you choose to reconfirm your investment, your investment will not be accruing interest during this time and will simply be held until such time as the new Offering Deadline is reached without the Company receiving the Target Offering Amount, at which time it will be returned to you without interest or deduction, or the Company receives the Target Offering Amount, at which time it will be released to the Company to be used as set forth herein. Upon or shortly after the release of such funds to the Company, the Securities will be issued and distributed to you.

The Company may also end the Offering early.

If the Target Offering Amount is met after twenty one (21) calendar days, but before the Offering Deadline, the Company can end the Offering by providing notice to Investors at least 5 business days prior to the end of the Offering.

This means your failure to participate in the Offering in a timely manner, may prevent you from being able to invest in this Offering – it also means the Company may limit the amount of capital it can raise during the Offering by ending the Offering early.

The Company has the right to conduct multiple closings during the Offering.

If the Company meets certain terms and conditions, an intermediate close of the Offering can occur, which will allow the Company to draw down on up to seventy percent (70%) of the proceeds committed and captured in the Offering during the relevant period. The Company may choose to continue the Offering thereafter. Investors should be mindful that this means they can make multiple investment commitments in the Offering, which may be subject to different cancellation rights. For example, if an intermediate close occurs and later a material change occurs as the Offering continues, Investors whose investment commitments were previously closed upon will not have the right to re-confirm their investment as it will be deemed to have been completed prior to the material change.

Risks Related to the Securities

The Securities will not be freely tradable under the Securities Act until one year from the initial purchase date. Although the Securities may be tradable under federal securities law, state securities regulations may apply, and each Investor should consult with their attorney.

You should be aware of the long-term nature of this investment. There is not now and likely will not ever be a public market for the Securities. Because the Securities have not been registered under the Securities Act or under the securities laws of any state or foreign jurisdiction, the Securities have transfer restrictions and cannot be resold in the United States except pursuant to Rule 501 of Regulation CF. It is not currently contemplated that registration under the Securities Act or other securities laws will be effected. Limitations on the transfer of the Securities may also adversely affect the price that you might be able to obtain for the Securities in a private sale. Investors should be aware of the long-term nature of their investment in the Company. Each Investor in this Offering will be required to represent that they are purchasing the Securities for their own account, for investment purposes and not with a view to resale or distribution thereof.

Investors will not have voting rights, even upon conversion of the Securities and will grant a third-party nominee broad power and authority to act on their behalf.

In connection with investing in this Offering to purchase a Nominee Crowd SAFE (Simple Agreement for Future Equity), investors will designate Republic Investment Services LLC (f/k/a NextSeed Services, LLC) (“**Nominee**”) to act on their behalf as agent and proxy in all respects. The Nominee will be entitled, among other things, to exercise any voting rights (if any) conferred upon the holder of a Nominee Crowd SAFE or any securities acquired upon their conversion, to execute on behalf of an investor all transaction documents related to the transaction or other corporate event causing the conversion of the Nominee Crowd SAFE, and as part of the conversion process the Nominee has the authority to open an account in the name of a qualified custodian, of the Nominee’s sole discretion, to take custody of any securities acquired upon conversion of the Nominee Crowd SAFE. Thus, by participating in the Offering, investors will grant broad discretion to a third party (the Nominee and its agents) to take various actions on their behalf, and investors will essentially not be able to vote upon matters related to the governance and affairs of the Company nor take or effect actions that might otherwise be available to holders of the Nominee Crowd SAFE and any securities acquired upon their conversion. Investors should not participate in the Offering unless he, she or it is willing to waive or assign certain rights that might otherwise be afforded to a holder of the Nominee Crowd SAFE to the Nominee and grant broad authority to the Nominee to take certain actions on behalf of the investor, including changing title to the Security.

Investors will not become equity holders until the Company decides to convert the Securities into PP3 Stock (the type of equity securities issuable upon conversion of the Securities) or until there is a change of control or sale of substantially all of the Company’s assets.

Investors will not have an ownership claim to the Company or to any of its assets or revenues for an indefinite amount of time and depending on when and how the Securities are converted, the Investors may never become equity holders of the Company. Investors will not become equity holders of the Company unless the Company elects to convert the Securities into PP3 Stock. The Company is under no obligation to convert the Securities into PP3 Stock. In certain instances, such as a sale of the Company or substantially all of its assets, an initial public offering or a dissolution or

bankruptcy, the Investors may only have a right to receive cash, to the extent available, rather than equity in the Company. Further, the Investor may never become an equity holder, merely a beneficial owner of an equity interest, should the Company or the Nominee decide to move the Nominee Crowd SAFE or the securities issuable thereto into a custodial relationship.

Investors will not have voting rights, even upon conversion of the Securities into PP3 Stock.

Investors will not have the right to vote upon matters of the Company even if and when their Securities are converted into PP3 Stock. Upon such conversion, the party holding the PP3 Stock on behalf of the Investors are required to enter into a proxy agreement with its designee to vote their shares at the direction of the Company's Chief Executive Officer. Thus, Investors will essentially never be able to vote upon any matters of the Company unless otherwise provided for by the Company.

Investors will not be entitled to any inspection or information rights other than those required by law.

Investors will not have the right to inspect the books and records of the Company or to receive financial or other information from the Company, other than as required by law. Other security holders of the Company may have such rights. Regulation CF requires only the provision of an annual report on Form C and no additional information. Additionally, there are numerous methods by which the Company can terminate annual report obligations, resulting in no information rights, contractual, statutory or otherwise, owed to Investors. This lack of information could put Investors at a disadvantage in general and with respect to other security holders, including certain security holders who have rights to periodic financial statements and updates from the Company such as quarterly unaudited financials, annual projections and budgets, and monthly progress reports, among other things.

Investors will be unable to declare the Security in "default" and demand repayment.

Unlike convertible notes and some other securities, the Securities do not have any "default" provisions upon which Investors will be able to demand repayment of their investment. The Company has ultimate discretion as to whether or not to convert the Securities upon a future equity financing and Investors have no right to demand such conversion. Only in limited circumstances, such as a liquidity event, may Investors demand payment and even then, such payments will be limited to the amount of cash available to the Company.

Equity securities acquired upon conversion of the Securities may be significantly diluted as a consequence of subsequent equity financings.

The Company's equity securities will be subject to dilution. The Company intends to issue additional equity to employees and third-party financing sources in amounts that are uncertain at this time, and as a consequence holders of equity securities resulting from the conversion of the Securities will be subject to dilution in an unpredictable amount. Such dilution may reduce the Investor's control and economic interests in the Company.

The amount of additional financing needed by the Company will depend upon several contingencies not foreseen at the time of this Offering. Generally, additional financing (whether in the form of loans or the issuance of other securities) will be intended to provide the Company with enough capital to reach the next major corporate milestone. If the funds received in any additional financing are not sufficient to meet the Company's needs, the Company may have to raise additional capital at a price unfavorable to their existing investors, including the holders of the Securities. The availability of capital is at least partially a function of capital market conditions that are beyond the control of the Company. There can be no assurance that the Company will be able to accurately predict the future capital requirements necessary for success or that additional funds will be available from any source. Failure to obtain financing on favorable terms could dilute or otherwise severely impair the value of the Securities.

In addition, the Company has certain equity grants and convertible securities outstanding. Should the Company enter into a financing that would trigger any conversion rights, the converting securities would further dilute the equity securities receivable by the holders of the Securities upon a qualifying financing.

Equity securities issued upon conversion of the Securities may be substantially different from other equity securities offered or issued by the Company at the time of conversion.

In the event the Company decides to exercise the conversion right, the Company will convert the Securities into PP3 Stock with the same rights, preferences, protections, and other benefits or privileges provided to other holders of PP3 Stock of the Company, subject to each Investor's execution of the Nominee Rider and Waiver included in the Nominee Crowd Safe.

The forgoing paragraph is only a summary of a portion of the conversion feature of the Securities; it is not intended to be complete, and is qualified in its entirety by reference to the full text of the Nominee Crowd Safe, which is attached hereto as Exhibit C.

The shares of PP3 Stock from which the Securities may be converted into do not have anti-dilution rights, which means that future equity financings or other issuances of securities will dilute the ownership percentage that the investor will have in the Company. It also means that if future financing rounds are done at a lower valuation, you will not receive the benefit of additional shares so that your valuation will remain the same. Our existing PP3 Stock, Preferred Stock and any future series of Preferred Stock that we issue or any debt securities that we issue in the future have or will have a liquidation preference and if there is a liquidation of our company or sale of our company, the holders of such preferred stock or debt securities would have a preference in the payment of amounts owed to them such that you may not receive a large portion of (or any of) the assets, including any cash, to be distributed in liquidation.

There is no present market for the Securities and we have arbitrarily set the price.

The Offering price was not established in a competitive market. We have arbitrarily set the price of the Securities with reference to the general status of the securities market and other relevant factors. The Offering price for the Securities should not be considered an indication of the actual value of the Securities and is not based on our asset value, net worth, prior earnings, revenues or other established criteria of value. We cannot guarantee that the Securities can be resold at the Offering price or at any other price.

The conversion price of the Securities is \$1.9314 and is not subject to adjustment.

Upon any conversion of the Securities, including in connection with any equity financing, liquidity event or dissolution event, as defined in and in accordance with the Securities, the purchase amount of the Securities will convert at \$1.9314, irrespective of the valuation or capitalization of the Company. The Securities provide no valuation cap or discount, nor provide any other downside protection to the Investors, including in the event any equity financing, liquidity event or dissolution event would result in a lower conversion price. Lastly, the Company may issue additional securities prior to any equity financing, liquidity event or dissolution event which, although reducing the price per share of the capital stock of the Company, will not result in any adjustment to the conversion price of the Securities.

In the event of the dissolution or bankruptcy of the Company, Investors will not be treated as debt holders and therefore are unlikely to recover any proceeds.

In the event of the dissolution or bankruptcy of the Company, the holders of the Securities that have not been converted will be entitled to distributions as described in the Securities. This means that such holders will only receive distributions once all of the creditors and more senior security holders have been paid in full. Neither holders of the Securities nor holders of PP3 Stock can be guaranteed any proceeds in the event of the dissolution or bankruptcy of the Company.

While the Securities provide mechanisms whereby holders of the Securities would be entitled to a return of their purchase amount upon the occurrence of certain events, if the Company does not have sufficient cash on hand, this obligation may not be fulfilled.

Upon the occurrence of certain events, as provided in the Securities, holders of the Securities may be entitled to a return of the principal amount invested. Despite the contractual provisions in the Securities, this right cannot be guaranteed if the Company does not have sufficient liquid assets on hand. Therefore, potential Investors should not assume a guaranteed return of their investment amount.

There is no guarantee of a return on an Investor's investment.

There is no assurance that an Investor will realize a return on their investment or that they will not lose their entire investment. For this reason, each Investor should read this Form C and all exhibits carefully and should consult with their attorney and business advisor prior to making any investment decision.

IN ADDITION TO THE RISKS LISTED ABOVE, RISKS AND UNCERTAINTIES NOT PRESENTLY KNOWN, OR WHICH WE CONSIDER IMMATERIAL AS OF THE DATE OF THIS FORM C, MAY ALSO HAVE AN ADVERSE EFFECT ON OUR BUSINESS AND RESULT IN THE TOTAL LOSS OF YOUR INVESTMENT.

BUSINESS

Description of the Business

At Altwork, we create products that deliver the very best way to work with a computer. We put the wellbeing of our bodies first to maximize productivity. Altwork Stations are designed for professionals who work long hours on a computer and we are especially popular with those who used to work in a corporate office. The Altwork Station is a holistic home office solution combining the best features of an ergonomic chair, ergonomic desk and standing workstation. We have sit, stand and zero gravity recline options integrating your keyboard, laptop and monitor. Our work stations and accessories allow our customers to better focus and work comfortably, especially for people with neck or back injuries. Recognizing the huge shift toward teleconferencing, Altwork also developed a video conferencing system to allow people to have a better connection through the screen. It provides better lighting and allows professionals to maintain eye contact while looking at other participants on the call. This eye-to-eye connection better simulates the experience of actually sitting across from each other.

Business Plan

At Altwork, we create products that deliver the very best way to work with a computer and put the wellbeing of our bodies first while also maximizing productivity. Altwork Stations are designed for professionals who work long hours on a computer. More and more of world economy is being created at the screen.

With the dramatic shift for digital workers to hybrid / remote work, demand for office furniture is expected to grow rapidly. This will be driven by the reconfiguring of corporate offices to match the change. More importantly for Altwork, home and local small satellite offices are expected to receive dramatic investment. What was an office for occasional work will become the office where the focused work is done.

Altwork is expanding its product line to meet the evolving needs of these important professionals. In 2022 Altwork is launching its TruVue video conferencing station. This product works great as an accessory to the Altwork Stations but it also can be used by customers who still use a traditional desk. This product expansion allows new customers to experience the quality and thoughtfulness of Altwork's products, at a lower entry price. We expect to add additional accessory products to increase the joy Altwork customers get from their existing Altwork Stations. Further, we expect to add new products at lower and higher price points to expand our customer base.

A headwind for customers wanting to purchase Stations has been the limited demo facilities Altwork has had. In 2021, successfully tested a remote showroom model. We set up a demo workstation in a closed door office at a coworking location along with cameras and video conferencing. This allows customers to get a full demo with an Altwork live salesperson in a remote location. Originally this was done to limit exposure in the pandemic, however, both customers and Altwork love the convenience of this solution. Altwork will be expanding these sites in the US in 2022 and potentially internationally later.

Competition

Altwork serves the ergonomic furniture market. While there are many desk and chair manufactures, there is no direct competitor offering something substantially similar to Altwork's fully integrated standing to full recline workstations. The largest companies are the high-quality office furniture companies like HermanMiller, Steelcase and Haworth. These companies sell billions of dollars of tables and chairs to homes and offices every year. These companies primarily sell through their dealer networks and have had varying degree of success trying to maintain a dealer and establish a DTC model. There are two other smaller categories in which customers generally compare Altwork. First, the highly stylized "scorpion" gaming chairs. Second, there are some small specialized ergonomic furniture companies that sell things that include a lay-down feature.

The markets in which our products are sold are highly competitive. Our products compete against similar products of many large and small companies, including well-known global competitors. In many of the markets and industry segments in which we sell our products, we compete against other branded products as well as retailers' private-label brands. Product quality, performance, value and packaging, and delivery costs are also important differentiating factors.

Customer Base

Altwork's customers are primarily professionals who work in front of a screen. Our customers tend to range in age from 30-60. Our customers range from self-made billionaires to people on disability. The majority of our customers are in the U.S., but we have customers all over the world.

Supply Chain

Altwork's products are primarily produced in partner factories outside of the United States. Altwork developed the manufacturing expertise internally prior to developing the outside factories. These factories are not owned by Altwork. They have been in continuous operation for many years and Altwork maintains positive relationships with the largest customers of the factories. It retains all intellectual property, manufacturing and design documentation. It has maintained a positive relationship with its various factories for many years. Additional factories could be established in any part of the world with a favorable balance of talent, costs and shipping infrastructure. Shipments to the USA are typically done via ocean freight to a third party logistics warehouse. International shipments can be either shipped directly from the factories or from our 3PL in the US depending on current shipping costs.

Altwork uses a third party logistics warehouse and fulfillment center in California. Remote showrooms are supplied from international co-working businesses. The company also uses outside accounting, legal and general administrative support services.

THE OFFERING AND THE SECURITIES

The Offering

The Company is offering a minimum amount of \$25,000 (the “**Target Offering Amount**”) and up to a maximum amount of \$1,070,000 (the “**Maximum Offering Amount**”) of Nominee Crowd Safe (Simple Agreement for Future Equity) (the “**Securities**”) on a best efforts basis as described in this Form C (this “**Offering**”). We must raise an amount equal to or greater than the Target Offering Amount by April 21, 2022 (the “**Offering Deadline**”). Unless we receive investment commitments, which are fully paid for and meet all other requirements set by this Offering, in an amount not less than the Target Offering Amount by the Offering Deadline, no Securities will be sold in this Offering, all investment commitments will be cancelled and all committed funds will be returned. Potential purchasers of the Securities are referred to herein as “**Investors**” or “**you**.”

The price of the Securities was determined arbitrarily, does not necessarily bear any relationship to the Company’s asset value, net worth, revenues or other established criteria of value, and should not be considered indicative of the actual value of the Securities. The minimum amount that an Investor may invest in the Offering is \$100 and the maximum amount that an Investor may invest in the Offering is \$107,000, each of which is subject to adjustment in the Company’s sole discretion.

In order to purchase the Securities, you must make a commitment to purchase by completing the subscription process hosted by OpenDeal Portal LLC dba Republic (the “**Intermediary**”), including complying with the Intermediary’s know your customer (KYC) and anti-money laundering (AML) policies. **If an Investor makes an investment commitment under a name that is not their legal name, they may be unable to redeem their Security indefinitely, and neither the Intermediary nor the Company are required to correct any errors or omissions made by the Investor.**

Investor funds will be held in escrow with Piermont Bank until the Target Offering Amount has been met or exceeded and one or more closings occur. Investors may cancel an investment commitment until up to 48 hours prior to the Offering Deadline, or such earlier time as the Company designates pursuant to Regulation CF, using the cancellation mechanism provided by the Intermediary. The Intermediary accesses the Piermont Bank’s services via a technological integration with Prime Trust, LLC that allows users of Prime Trust’s services to access certain services of Piermont Bank. **Investors using a credit card to invest must represent and warrant to cancel any investment commitment(s) by submitting a request through the Intermediary at least 48 hours prior to the Offering Deadline, instead of attempting to claim fraud or claw back their committed funds.**

The Company will notify Investors when the Target Offering Amount has been reached through the Intermediary. If the Company reaches the Target Offering Amount prior to the Offering Deadline, it may close the Offering early *provided* (i) the expedited Offering Deadline must be twenty-one (21) days from the time the Offering was opened, (ii) the Intermediary must provide at least five (5) business days’ notice prior to the expedited Offering Deadline to the Investors and (iii) the Company continues to meet or exceed the Target Offering Amount on the date of the expedited Offering Deadline.

Material Changes

If any material change occurs related to the Offering prior to the current Offering Deadline the Company will provide notice to Investors and receive reconfirmations from Investors who have already made commitments. If an Investor does not reconfirm their investment commitment after a material change is made to the terms of the Offering within five (5) business days of receiving notice, the Investor’s investment commitment will be cancelled and the committed funds will be returned without interest or deductions. If an Investor does not cancel an investment commitment before the Target Offering Amount is reached, the funds will be released to the Company upon the closing of the Offering and the Investor will receive the Securities in exchange for their investment.

Intermediate Closings

In the event an amount equal to two (2) times the Target Offering Amount is committed and meets all required terms of the Offering prior to the Offering Deadline on such date or such later time the Company designates pursuant to Rule 304(b) of Regulation CF, the Company may conduct the first of multiple closings of the Offering early, *provided* (i) the early closing date must be twenty-one (21) days from the time the Offering opened and (ii) that all Investors

will receive notice of such early closing date at least five (5) business days prior to such new offering deadline (absent a material change that would require an extension of the Offering and reconfirmation of all investment commitments). Investors who committed on the date such notice is provided or prior to the issuance of such notice will be able to cancel their investment commitment until 48 hours before such early closing date.

If the Company conducts an initial closing (the “**Initial Closing**”), the Company agrees to only withdraw up to seventy percent (70%) of the proceeds that are in escrow and will only conduct such Initial Closing if there are more than twenty-one (21) days remaining before the Offering Deadline as of the date of the Initial Closing. The Company may only conduct another close (a “**Subsequent Closing**”) before the Offering Deadline if the amount of investment commitments made as of the date of such Subsequent Closing exceeds two times the Target Offering Amount as of the date of the Initial Closing and there are more than twenty-one (21) days remaining before the Offering Deadline as of the date of such Subsequent Closing.

Any investment commitments received after an intermediate closing will be released to the Company upon a subsequent closing and the Investor will receive evidence of the Securities via electronic certificate/PDF in exchange for their investment commitment as soon as practicable thereafter.

The Company has agreed to return all funds to Investors in the event a Form C-W is ultimately filed in relation to this Offering, regardless of whether multiple closings are conducted.

Investment commitments are not binding on the Company until they are accepted by the Company, which reserves the right to reject, in whole or in part, in its sole and absolute discretion, any investment commitment. If the Company rejects all or a portion of any investment commitment, the applicable prospective Investor’s funds will be returned without interest or deduction.

PIERMONT BANK, THE ESCROW AGENT SERVICING THE OFFERING, HAS NOT INVESTIGATED THE DESIRABILITY OR ADVISABILITY OF AN INVESTMENT IN THIS OFFERING OR THE SECURITIES OFFERED HEREIN. THE ESCROW AGENT MAKES NO REPRESENTATIONS, WARRANTIES, ENDORSEMENTS, OR JUDGMENT ON THE MERITS OF THE OFFERING OR THE SECURITIES OFFERED HEREIN. PP3 Stock does not provide any inspection or information rights (other than those contemplated by Regulation CF or otherwise required by law). Except as specified below, the Company has no obligation to convert the Securities into PP3 Stock.

Conversion Upon the First Equity Financing

If the Company elects to convert the Securities upon the first Equity Financing following the issuance of the Securities, at the Nominee's discretion the Investor will receive the number of shares of PP3 Stock equal to the greater of the quotient obtained by dividing the amount the Investor paid for the Securities (the "**Purchase Amount**") by the PP3 Stock Price.

Conversion After the First Equity Financing

If the Company elects to convert the Securities upon an Equity Financing other than the first Equity Financing following the issuance of the Securities, the Investor will receive the number of shares of PP3 Stock equal to the quotient obtained by dividing (a) the Purchase Amount by (b) the PP3 Stock Price.

Conversion Upon a Liquidity Event

In the case of the Company's undergoing an **IPO** (as defined below) of its Capital Stock, a **Change of Control** (as defined below) of the Company, or a **Maturity Event** (as defined below) (any of these events, a "**Liquidity Event**") prior to any Equity Financing, the Investor will receive, at the option of the Nominee and within thirty (30) days of receiving notice (whether actual or constructive), PP3 Stock of the Company equal to the Purchase Amount divided by the PP3 Stock Price.

"**Change of Control**" as used above, means (i) a transaction or series of related transactions in which any person or group becomes the beneficial owner of more than fifty percent (50%) of the outstanding voting securities entitled to elect the Company's board of directors, (ii) any reorganization, merger or consolidation of the Company, in which the outstanding voting security holders of the Company fail to retain at least a majority of such voting securities following such transaction or (iii) a sale, lease or other disposition of all or substantially all of the assets of the Company.

"**Maturity Event**" as used above, means: the earlier of (i) the eighteen (18) month anniversary of the final close and the offer and sale of this and all of Series 2022 Crowd SAFEs by the Company through the Intermediary's platform pursuant to a Form C (inclusive of all subsequent amendments or modifications thereto) filed with the Securities and

Exchange Commission or (ii) the Company's election, in its sole discretion, to accelerate and declare a Maturity Event before such time.

Conversion Upon a Liquidity Event Following an Equity Financing

In the case of a Liquidity Event following any Equity Financing, the Investor will receive, at the option of the Nominee and within thirty (30) days of receiving notice (whether actual or constructive), a number of shares of PP3 Stock equal to the Purchase Amount divided by the PP3 Stock Price. Shares of PP3 Stock granted in connection therewith shall have the same liquidation rights and preferences as the other shares of PP3 Stock issued by the Company.

If the Company's board of directors determines in good faith that delivery of equity securities to the Investor pursuant to Liquidity Event paragraphs above would violate applicable law, rule or regulation, then the Company shall deliver to Investor in lieu thereof, a cash payment equal to the fair market value of such PP3 Stock, as determined in good faith by the Company's board of directors (or other applicable governing body if the Company is a limited liability company).

Liquidation Preference

Upon a liquidation event, holders of PP3 Stock will be entitled to receive, prior to any distribution to any holders of shares of Series A Preferred Stock, Seed Stock, or Common Stock, one times the Original Issue Price of each share of PP3 Stock (the "**PP3 Liquidation Preference**"). Subject to payment of the PP3 Liquidation Preference, the holders of Series A Preferred Stock shall be entitled to receive, prior to any distribution to any holders of shares of Seed Stock or Common Stock, an amount per share equal to \$1.0641 per share (the "**Series A Liquidation Preference**"). Subject to payment of the PP3 Liquidation Preference and the Series A Liquidation Preference, the holders of shares of Seed Stock shall be entitled to receive, prior to any distribution to any holders of shares of Common Stock, an amount per share equal to \$0.4375 per share (the "**Seed Stock Liquidation Preference**"). Subject to payment in full of the PP3 Liquidation Preference, the Series A Liquidation Preference, and the Seed Stock Liquidation Preference, the balance available for distribution shall be distributed to the holders of the Common Stock.

Dissolution

If there is a Dissolution Event (as defined below) before the Securities terminate, subject to the preferences applicable to any series of preferred stock then outstanding, the Company will distribute all proceeds legally available for distribution with equal priority among the (i) holders of the Securities (on an as converted basis), (ii) all other holders of instruments sharing in the distribution of proceeds of the Company at the same priority as other holders of PP3 Stock upon a Dissolution Event and (iii) all holders of PP3 Stock.

A "**Dissolution Event**" means (i) a voluntary termination of operations by the Company, (ii) a general assignment for the benefit of the Company's creditors or (iii) any other liquidation, dissolution or winding up of the Company (excluding a Liquidity Event), whether voluntary or involuntary.

Termination

The Securities terminate upon (without relieving the Company of any obligations arising from a prior breach of or non-compliance with the Securities) upon the earlier to occur of: (i) the issuance of shares in the PP3 Stock to the Investor pursuant to the conversion provisions of the Nominee Crowd Safe agreement or (ii) the payment, or setting aside for payment, of amounts due to the Investor pursuant to a Liquidity Event or a Dissolution Event.

Voting and Control

Neither the Securities nor the securities issuable upon their conversion will allow Investors to vote on Company matters. In addition, to facilitate the Nominee Crowd SAFE Investors being able to act together and cast a vote as a group, to the extent any securities acquired upon conversion of the Securities confer the holder with voting rights (whether provided by the Company's governing documents or by law), the Nominee (as defined above) will act on behalf of the holders as agent and proxy in all respects. The Nominee will vote consistently at the direction of the Chief Executive Officer of the Company.

Anti-Dilution Rights

The Securities (and the securities issuable upon their conversion) do not have anti-dilution rights, which means that future equity issuances and other events will dilute the ownership percentage that the Investor may eventually have in the Company.

Restrictions on Transfer

Any Securities sold pursuant to Regulation CF being offered may not be transferred by any Investor of such Securities during the one-year holding period beginning when the Securities were issued, unless such Securities are transferred: (1) to the Company; (2) to an accredited investor, as defined by Rule 501(d) of Regulation D promulgated under the Securities Act; (3) as part of an IPO; or (4) to a member of the family of the Investor or the equivalent, to a trust controlled by the Investor, to a trust created for the benefit of a member of the family of the Investor or the equivalent, or in connection with the death or divorce of the Investor or other similar circumstances. “Member of the family” as used herein means a child, stepchild, grandchild, parent, stepparent, grandparent, spouse or spousal equivalent, sibling, mother/father/daughter/son/sister/brother-in-law, and includes adoptive relationships. Each Investor should be aware that although the Securities may legally be able to be transferred, there is no guarantee that another party will be willing to purchase them.

In addition to the foregoing restrictions, prior to making any transfer of the Securities or any capital stock into which they are convertible, such transferring Investor must either make such transfer pursuant to an effective registration statement filed with the SEC or provide the Company with an opinion of counsel reasonably satisfactory to the Company stating that a registration statement is not necessary to effect such transfer.

In addition, the Investor may not transfer the Securities or any capital stock into which they are convertible to any of the Company’s competitors, as determined by the Company in good faith.

Furthermore, upon the event of an IPO, the capital stock into which the Securities are converted will be subject to a lock-up period and may not be lent, offered, pledged, or sold for up to 180 days following such IPO.

Other Material Terms

- The Company does not have the right to repurchase the Securities.
- The Company cannot determine if it currently has enough capital stock authorized to issue upon the conversion of the Securities, because the amount of capital stock to be issued is based on the occurrence of future events.

SV TOOL CORPORATION DBA ALTWORK
NOTES TO FINANCIAL STATEMENTS
FOR YEAR ENDED TO DECEMBER 31, 2020 AND DECEMBER 31, 2019

1. NATURE OF OPERATIONS

SV Tool Corporation DBA Altwork was incorporated on December 20, 2010 in the state of California. The financial statements of SV Tool Corporation DBA Altwork (which may be referred to as the “Company”, “we”, “us”, or “our”) are prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The Company’s headquarters are located in Santa Rosa, California.

SV TOOL CORPORATION dba ALTWORK design and sells aerospace influenced ergonomic work station. Designs are completely owned and controlled by SV Tool. We have a contract manufacturer in China which manufactures our product and ships them to our warehouse in California from which orders are fulfilled.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America (“US GAAP”). The Company has adopted the calendar year as its basis of reporting.

Use of Estimates

The preparation of financial statements in conformity with United States GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents include all cash in banks. The Company’s cash is deposited in demand accounts at financial institutions that management believes are creditworthy. The Company’s cash and cash equivalents in bank deposit accounts, at times, may exceed federally insured limits. As of December 31, 2020 and December 31, 2019, the Company’s cash and cash equivalents exceeded FDIC insured limits by \$639,841 and \$0, respectively.

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable are recorded at net realizable value or the amount that the Company expects to collect on gross customer trade receivables. We estimate losses on receivables based on known troubled accounts and historical experience of losses incurred. Receivables are considered impaired and written-off when it is probable that all contractual payments due will not be collected in accordance with the terms of the agreement. As of December 31, 2020 and 2019, the Company determined that no reserve was necessary.

Inventories

Inventories are valued at the lower of cost and net realizable value. Costs related to finished goods and spare parts which are determined using an average method.

SV TOOL CORPORATION DBA ALTHWORK
NOTES TO FINANCIAL STATEMENTS
FOR YEAR ENDED TO DECEMBER 31, 2020 AND DECEMBER 31, 2019

Property and Equipment

Property and equipment are stated at cost. Normal repairs and maintenance costs are charged to earnings as incurred and additions and major improvements are capitalized. The cost of assets retired or otherwise disposed of and the related depreciation are eliminated from the accounts in the period of disposal and the resulting gain or loss is credited or charged to earnings.

Depreciation is computed over the estimated useful lives of the related asset type or term of the operating lease using the straight-line method for financial statement purposes. The estimated service lives for property and equipment is as follows:

Category	Useful Life
Equipment	5-7 years
Tooling	5-7 years
Vehicles	5-7 years
Equipment	5-7 years

Impairment of Long-lived Assets

Long-lived assets, such as property and equipment and identifiable intangibles with finite useful lives, are periodically evaluated for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. We look for indicators of a trigger event for asset impairment and pay special attention to any adverse change in the extent or manner in which the asset is being used or in its physical condition. Assets are grouped and evaluated for impairment at the lowest level of which there are identifiable cash flows, which is generally at a location level. Assets are reviewed using factors including, but not limited to, our future operating plans and projected cash flows. The determination of whether impairment has occurred is based on an estimate of undiscounted future cash flows directly related to the assets, compared to the carrying value of the assets. If the sum of the undiscounted future cash flows of the assets does not exceed the carrying value of the assets, full or partial impairment may exist. If the asset carrying amount exceeds its fair value, an impairment charge is recognized in the amount by which the carrying amount exceeds the fair value of the asset. Fair value is determined using an income approach, which requires discounting the estimated future cash flows associated with the asset.

Intangible Assets

The Company capitalizes its patent and filing fees and legal patent and prosecution fees in connection with internally developed pending patents. When pending patents are issued, patents will be amortized over the expected period to be benefitted, not to exceed the patent lives, which may be as long as 10 years.

We capitalize software development costs once technological feasibility is established and we determine that such costs are recoverable against future net sales. We evaluate technological feasibility on a product-by-product basis. Once technological feasibility is established, we capitalize software development costs. Amounts related to software development for which technological feasibility is not yet met are charged as incurred to statement of operations. Commencing upon product release, capitalized software development costs are amortized to "Cost of revenue, service, and hardware used for resale" in our statements of operations based on the ratio of current gross sales to total projected gross sales.

SV TOOL CORPORATION DBA ALTWORK
NOTES TO FINANCIAL STATEMENTS
FOR YEAR ENDED TO DECEMBER 31, 2020 AND DECEMBER 31, 2019

Income Taxes

SV Took Corporation DBA Altwork is a C corporation for income tax purposes. The Company accounts for income taxes under the liability method, and deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying values of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. A valuation allowance is provided on deferred tax assets if it is determined that it is more likely than not that the deferred tax asset will not be realized. The Company records interest, net of any applicable related income tax benefit, on potential income tax contingencies as a component of income tax expense. The Company records tax positions taken or expected to be taken in a tax return based upon the amount that is more likely than not to be realized or paid, including in connection with the resolution of any related appeals or other legal processes. Accordingly, the Company recognizes liabilities for certain unrecognized tax benefits based on the amounts that are more likely than not to be settled with the relevant taxing authority. The Company recognizes interest and/or penalties related to unrecognized tax benefits as a component of income tax expense.

Concentration of Credit Risk

The Company maintains its cash with a major financial institution located in the United States of America which it believes to be creditworthy. Balances are insured by the Federal Deposit Insurance Corporation up to \$250,000. At times, the Company may maintain balances in excess of the federally insured limits.

Revenue Recognition

The Company follows the provisions and the disclosure requirements described in ASU 2014-09 also referred to as Topic 606.

Revenue recognition, according to Topic 606, is determined using the following steps:

Identification of the contract, or contracts, with the customer: the Company determines the existence of a contract with a customer when the contract is mutually approved; the rights of each party in relation to the services to be transferred can be identified, the payment terms for the services can be identified, the customer has the capacity and intention to pay and the contract has commercial substance.

Identification of performance obligations in the contract: Performance obligations consist of a promised in a contract (written or oral) with a customer to transfer to the customer either a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer.

Recognition of revenue when, or how, a performance obligation is met: Revenues are recognized when or as control of the promised goods or services is transferred to customers.

The Company earns revenues from the sale of aerospace influenced by ergonomic work station use to the final customers.

Cost of sales

Costs of goods sold include the cost of finished goods sold, freight and delivery.

SV TOOL CORPORATION DBA ALTWORK
NOTES TO FINANCIAL STATEMENTS
FOR YEAR ENDED TO DECEMBER 31, 2020 AND DECEMBER 31, 2019

Advertising and Promotion

Advertising and promotional costs are expensed as incurred. Advertising and promotional expense for the years ended December 31, 2020 and December 31, 2019 amounted to \$654,005 and \$370,803, which is included in sales and marketing expense.

Stock-Based Compensation

The Company accounts for stock-based compensation to both employee and non-employees in accordance with ASC 718, Compensation - Stock Compensation. Under the fair value recognition provisions of ASC 718, stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense ratably over the requisite service period, which is generally the option vesting period. The Company uses the Black-Scholes option pricing model to determine the fair value of stock options.

Fair Value of Financial Instruments

The carrying value of the Company's financial instruments included in current assets and current liabilities (such as cash and cash equivalents, restricted cash and cash equivalents, accounts receivable, accounts payable and accrued expenses approximate fair value due to the short-term nature of such instruments).

The inputs used to measure fair value are based on a hierarchy that prioritizes observable and unobservable inputs used in valuation techniques. These levels, in order of highest to lowest priority, are described below:

Level 1—Quoted prices (unadjusted) in active markets that are accessible at the measurement date for identical assets or liabilities.

Level 2—Observable prices that are based on inputs not quoted on active markets but corroborated by market data.

Level 3—Unobservable inputs reflecting the Company's assumptions, consistent with reasonably available assumptions made by other market participants. These valuations require significant judgment.

Subsequent Events

The Company considers events or transactions that occur after the balance sheet date, but prior to the issuance of the financial statements to provide additional evidence relative to certain estimates or to identify matters that require additional disclosure. Subsequent events have been evaluated through November 30, 2021, which is the date the financial statements were issued.

Recently Issued and Adopted Accounting Pronouncements

In February 2019, FASB issued ASU No. 2019-02, Leases, that requires organizations that lease assets, referred to as "lessees", to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases with lease terms of more than 12 months. ASU 2019-02 will also require disclosures to help investors and other financial statement users better understand the amount, timing, and uncertainty of cash flows arising from leases and will include qualitative and quantitative requirements. The new standard for nonpublic entities will be effective for fiscal years beginning after December 15, 2020, and interim periods within fiscal years beginning after December 15, 2021,

SV TOOL CORPORATION DBA ALTWORK
NOTES TO FINANCIAL STATEMENTS
FOR YEAR ENDED TO DECEMBER 31, 2020 AND DECEMBER 31, 2019

and early application is permitted. We are currently evaluating the effect that the updated standard will have on the financial statements and related disclosures.

In June 2019, FASB amended ASU No. 2019-07, Compensation – Stock Compensation, to expand the scope of Topic 718, Compensation – Stock Compensation, to include share-based payment transactions for acquiring goods and services from nonemployees. The new standard for nonpublic entities will be effective for fiscal years beginning after December 15, 2019, and interim periods within fiscal years beginning after December 15, 2020, and early application is permitted. The standard implementation did not have a material impact.

In August 2019, amendments to existing accounting guidance were issued through Accounting Standards Update 2019-15 to clarify the accounting for implementation costs for cloud computing arrangements. The amendments specify that existing guidance for capitalizing implementation costs incurred to develop or obtain internal-use software also applies to implementation costs incurred in a hosting arrangement that is a service contract. The guidance is effective for fiscal years beginning after December 15, 2020, and interim periods within fiscal years beginning after December 15, 2021, and early application is permitted. The standard implementation did not have a material impact.

The FASB issues ASUs to amend the authoritative literature in ASC. There have been a number of ASUs to date, including those above, that amend the original text of ASC. Management believes that those issued to date either (i) provide supplemental guidance, (ii) are technical corrections, (iii) are not applicable to us or (iv) are not expected to have a significant impact on our financial statements.

SV TOOL CORPORATION DBA ALTWORK
NOTES TO FINANCIAL STATEMENTS
FOR YEAR ENDED TO DECEMBER 31, 2020 AND DECEMBER 31, 2019

The risk-free interest rate assumption for options granted is based upon observed interest rates on the United States government securities appropriate for the expected term of the Company's employee stock options.

The expected term of employee stock options is calculated using the simplified method which takes into consideration the contractual life and vesting terms of the options.

The Company determined the expected volatility assumption for options granted using the historical volatility of comparable public company's common stock. The Company will continue to monitor peer companies and other relevant factors used to measure expected volatility for future stock option grants, until such time that the Company's common stock has enough market history to use historical volatility.

The dividend yield assumption for options granted is based on the Company's history and expectation of dividend payouts. The Company has never declared or paid any cash dividends on its common stock, and the Company does not anticipate paying any cash dividends in the foreseeable future.

Management estimated the fair value of common stock based on recent sales to third parties. Forfeitures are recognized as incurred.

Competition

Unique, patented innovation nurtures industry leadership

Other high-tech workstations on the market offer a fraction of the Alwork Station's capabilities at up to triple the price.

But our main competition isn't other high-tech workstations—they don't even compare. No, it's this damaging, all-pervading work ethic: if you ain't hurting, you ain't working. After centuries of believing the measure of success is how much our backs ache, the Alwork level of comfort seems almost illegal.

What are the restrictions on invitations to the AltworK Annual Product Roadmap Meeting?

Yes, you can purchase your Station, TruVue and other AltworK accessories prior to the campaign close. Your applicable store credit will be issued as a refund after the close of the campaign.

**Why should I invest in this company?
What's AltworK's story?**

The founding team has worked together for decades. John Speicher was rear-ended on the freeway and his back was badly injured. He was unable to sit in a traditional desk chair for even ten minutes. Because of this he started researching reclining workstations to solve his own painful situation. At this time Che was still engaged with the company that had bought the last company they founded to ensure a successful integration and to maximize the earnout attached to the acquisition. When he had completed that, John reached out and said, "You should see what I've been working on."

Out of John's initial need and Che's lifelong frustration with traditional tables and chairs, the spark of AltworK was born. We deeply believe there is a better way for humans to work with their computers and we believe that better way will result in a better future for all humans. We know that a better future will be designed on a screen—whether that's improving clean energy or finding the cure for cancer, it will be done by small teams of people at a screen, able to focus because they are not distracted by pain and discomfort.

How are you compensating your founding team?

The founding team deeply believes in the mission of Altwork and has been working tirelessly for years at minimal or no salary to establish the products and build a great company.

What's stopping other companies from doing this?

Altwork has built an extensive portfolio of patents and trademarks to protect the work we have done. These are both utility and design patents in the US and significant international markets. Our IP portfolio is a considerable barrier to entry for any of our would-be competitors.

As many people deeply understand: hardware is hard, it is right in the first word. All of the incredible effort the Altwork team made to conceptualize, develop, and manufacture our product line into production at sustainable margins is now a barrier to those that wish to compete.

Who are your competitors, and how exactly do they differ from you?

Our competitors are typically considered the high end office furniture manufactures like Herman Miller Knoll, Steelcase, etc. These companies and others in the “contract grade office furniture” market have historically sold around \$25B per year in the US, EU, and Japan. These companies sell the traditional computer-centric work stations where the computer is placed on the desk and the human rolls their chair to it and bends their body to match the position of the machine.

There are two other small categories worth mentioning. The first is the “scorpion style” products that tend to receive a lot of press but don't fit in the style of either a home or an office. They tend to be physically large and very aggressively styled. The second are niche ergonomic solutions for the injury driven user. These tend to be customized and expensive solutions. Altwork is proud that we have been able to help a huge number of people continue to work with their computers or return to work with our work stations. However, we recognize there will always be a small number of people that really need a specialized solution.

What do the next 5 years look like for Altwork?

Altwork expects to grow our base of altworkers (customers) with our current products. We will also be growing the product line to create the ultimate workstation, so customers can focus on their work, achieve their goals, but not sacrifice their bodies in the process. We expect to add new products at different price categories, as well as substantial increases to the accessories for our workstations.

There are 10s of billions of dollars worth of outdated tables and chairs sold as office furniture every year. These are fine for people who only spend a limited amount of time at the computer, or for those who care more about style over function. Altwork will continue to build its product line to take a larger percentage of that business.

How did you come up with your valuation?

Considering the current product line and the new video conferencing system potential in the current market trends, we see significant and lasting growth. Given the massive cultural shift to hybrid/remote work, this is an exceptional period to grow a company focused on making the best tools for people to work with their computers. Further, with the customer acceptance of the remote showroom model in the Q3 test period, we have a path to overcome one of the biggest obstacles to gaining new customers.

Why is Altwork crowdfunding?

We are working to revolutionize the way we work with our computers. We have built a great base of customers, but we want more friends to help envision a better future where we are able to focus better, achieve more, and stay healthy without pain. Raising capital is the next step.

(i) There is then in effect a registration statement under the Securities Act covering such proposed disposition and such disposition is made in accordance with such registration statement; or

(ii) The Investor shall have notified the Company of the proposed disposition and shall have furnished the Company with a detailed statement of the circumstances surrounding the proposed disposition and, if reasonably requested by the Company, the Investor shall have furnished the Company with an opinion of counsel reasonably satisfactory to the Company that such disposition will not require registration of such shares under the Securities Act.

(e) The Investor agrees that it shall not make any disposition of this instrument or any underlying securities to any of the Company's competitors, as determined by the Company in good faith.

(f) The Investor understands and agrees that the Company will place the legend set forth below or a similar legend on any book entry or other forms of notation evidencing this Crowd SAFE and any certificates evidencing the underlying securities, together with any other legends that may be required by state or federal securities laws, the Company's charter or bylaws, any other agreement between the Investor and the Company or any agreement between the Investor and any third party:

(l) The Investor agrees any action contemplated by this Crowd SAFE and requested by the Company must be completed by the Investor within thirty (30) calendar days of receipt of the relevant notice (whether actual or constructive) to the Investor.

IN WITNESS WHEREOF, the undersigned have caused this instrument to be duly executed and delivered.

Video Transcript – Altwork

We've come a long way over the past 150 years, developing countless industries and technologies that make our lives easier. We've revolutionized almost every aspect of daily life... with one shocking exception – the workplace.

Most of us still spend our days hunched over tables and chairs like we did in the 1800s.

And it's kind of shocking considering all the studies suggesting that sitting and slouching decreases productivity, inhibits creativity, and is bad for our health.

So why is THIS still the status quo?

It doesn't have to be.

At Altwork, our team of aerospace engineers set out to reimagine the workplace, and succeeded, designing high-tech stations that put humans at the center of the computing experience.

The Altwork Station allows users to sit, stand, or even recline in focus mode. As you move, the screen moves with you. No more slouching over screens.

It's a smarter way to work, increasing focus, productivity, creativity, and comfort.

Don't just take our word for it, check out our reviews. Happy customers and the press agree... this is the future.

While our ergonomic workstations solves an age-old problem, our latest product, tackles a very modern one – human connection across the digital divide.

TruVue is an integrated video conferencing station designed with eye contact in mind.

The adjustable camera mount allows you to look people in the eyes and see their expressions, almost as if you were in the same room as them.

And the customizable light panels ensure you can always be seen in the right light.

At Altwork, our mission is to help digital professionals reach their full potential.

With remote and hybrid here to stay, work has been changed forever. Join us and help make this a change for the better.

Customers

For the focus, achievement, & wellness of professionals

Our bodies hurt from years of sitting at our desks, and for many of us, it's hard to stay motivated and focused working from home. In addition to chronic back pain and fatigue from prolonged sitting, it's easy to feel isolated and unwell when even our human interactions take place on our screen.

More so than ever, the world is ready to move beyond obsolete work setups that constrain our creativity and diminish our health. Altwork is a better way to work, and we have the testimonials to prove it.

Business Model

A simple, flexible & profitable D2C model

We're proud to have been called the "Tesla of desks." Altwork products are seen as so much more than just a table and chairs—our customers are obsessed with how the ergonomic setup empowers them to have a long and healthy career. For some Altworkers, our products are the only way they can work a full day without pain.

Our obsessively customer-focused model is already profitable. We have a proven capacity to sustainably develop, sell, ship, and support our products. We use customer feedback to improve our products and expand our offering to meet their changing needs, further increasing revenue and brand loyalty to Altwork.

Market

We're supporting the seismic shift to hybrid work

With pre-pandemic work structures likely to become a relic of the past, hybrid work—spending time both working at the office and from home—is growing for digital workers, and this is just the beginning of a massive shift in how we work.

Competition

Unique, patented innovation nurtures industry leadership

Other high-tech workstations on the market offer a fraction of the Alwork Station's capabilities at up to triple the price.

But our main competition isn't other high-tech workstations—they don't even compare. No, it's this damaging, all-pervading work ethic: if you ain't hurting, you ain't working. After centuries of believing the measure of success is how much our backs ache, the Alwork level of comfort seems almost illegal.

**Why should I invest in this company?
What's Altwork's story?**

The founding team has worked together for decades. John Speicher was rear-ended on the freeway and his back was badly injured. He was unable to sit in a traditional desk chair for even ten minutes. Because of this he started researching reclining workstations to solve his own painful situation. At this time Che was still engaged with the company that had bought the last company they founded to ensure a successful integration and to maximize the earnout attached to the acquisition. When he had completed that, John reached out and said, "You should see what I've been working on."

Out of John's initial need and Che's lifelong frustration with traditional tables and chairs, the spark of Altwork was born. We deeply believe there is a better way for humans to work with their computers and we believe that better way will result in a better future for all humans. We know that a better future will be designed on a screen—whether that's improving clean energy or finding the cure for cancer, it will be done by small teams of people at a screen, able to focus because they are not distracted by pain and discomfort.

How are you compensating your founding team?

The founding team deeply believes in the mission of Altwork and has been working tirelessly for years at minimal or no salary to establish the products and build a great company.

What's stopping other companies from doing this?

Altwork has built an extensive portfolio of patents and trademarks to protect the work we have done. These are both utility and design patents in the US and significant international markets. Our IP portfolio is a considerable barrier to entry for any of our would-be competitors.

As many people deeply understand: hardware is hard, it is right in the first word. All of the incredible effort the Altwork team made to conceptualize, develop, and manufacture our product line into production at sustainable margins is now a barrier to those that wish to compete.

Who are your competitors, and how exactly do they differ from you?

Our competitors are typically considered the high end office furniture manufactures like Herman Miller Knoll, Steelcase, etc. These companies and others in the “contract grade office furniture” market have historically sold around \$25B per year in the US, EU, and Japan. These companies sell the traditional computer-centric work stations where the computer is placed on the desk and the human rolls their chair to it and bends their body to match the position of the machine.

There are two other small categories worth mentioning. The first is the “scorpion style” products that tend to receive a lot of press but don't fit in the style of either a home or an office. They tend to be physically large and very aggressively styled. The second are niche ergonomic solutions for the injury driven user. These tend to be customized and expensive solutions. Altwork is proud that we have been able to help a huge number of people continue to work with their computers or return to work with our work stations. However, we recognize there will always be a small number of people that really need a specialized solution.

What do the next 5 years look like for Altwork?

Altwork expects to grow our base of altworkers (customers) with our current products. We will also be growing the product line to create the ultimate workstation, so customers can focus on their work, achieve their goals, but not sacrifice their bodies in the process. We expect to add new products at different price categories, as well as substantial increases to the accessories for our workstations.

There are 10s of billions of dollars worth of outdated tables and chairs sold as office furniture every year. These are fine for people who only spend a limited amount of time at the computer, or for those who care more about style over function. Altwork will continue to build its product line to take a larger percentage of that business.

How did you come up with your valuation?

Considering the current product line and the new video conferencing system potential in the current market trends, we see significant and lasting growth. Given the massive cultural shift to hybrid/remote work, this is an exceptional period to grow a company focused on making the best tools for people to work with their computers. Further, with the customer acceptance of the remote showroom model in the Q3 test period, we have a path to overcome one of the biggest obstacles to gaining new customers.

Why is Altwork crowdfunding?

We are working to revolutionize the way we work with our computers. We have built a great base of customers, but we want more friends to help envision a better future where we are able to focus better, achieve more, and stay healthy without pain. Raising capital is the next step.
